Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-13, drawn to a method of making a keratinase, classified in class 435, subclass 69.1.
- II. Claim 14-27, drawn to a recombinant *Bacillus* having ker A inserted into its chromosome, classified in class 435, subclass 252.31.
- III. Claims 27-30 drawn to a method of making a recombinant *Bacillus*, classified in class 435, subclass 435.71.

Inventions III and II are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
